PROFESSIONAL SUMMARY

Turns ambiguous problems into testable requirements and delivered software. Identifies needed expertise, directs implementation and separate review, and makes acceptance decisions from reproducible evidence. Experience spans open-source software, AI evaluation, web delivery, and purchasing operations.

SELECTED PROJECT RESULTS

- **Delivered a working Rust implementation for Tokio's five-year-old feature request, rated E-hard.** Identified earlier fairness and parsing failures, then filtered disabled branches before code generation. Initial feature code and tests remained unchanged; a 450-invocation study found no unexpected results through 64 branches, and upstream CI passed. Received a favorable preliminary maintainer assessment; PR remains open and awaiting further review. Tokio PR #8374
- **Delivered a Grafana ShortURL compatibility fix that was approved and merged.** Replaced Kubernetes namespaces with the authenticated numeric org ID, omitted it for Grafana Cloud, and preserved configured subpaths. Added table-driven Go handler regressions; issue #130873 closed on merge. Grafana PR #131070
- **Co-created and released Read Shruti, a full stack author website for three books.** Delivered book pages, retailer links, search metadata, and aggregate page-view and retailer-click analytics using Next.js/React, TypeScript, Cloudflare Workers, and D1. readshruti.com
- **Held a Side Effects Lab change out of integration despite 1,336 passing tests.** Separate adversarial review found two ways its acceptance logic could approve behavior that violated the specification. Required correction and new regressions before integration.

PROFESSIONAL EXPERIENCE

Founder / Full Stack Web Developer / AI Evaluation & Governance - NoFuckery AI | **2026-Present**

- Translate project goals into specifications, acceptance criteria, and failure cases for web, Python, and Rust systems.
- Direct implementation and separate review; investigate conflicting findings using source changes, tests, and logs, and require regression coverage before accepting corrections.
- Own Read Shruti's web architecture, API validation, search metadata, and aggregate analytics, from implementation requirements through release checks.

Founder / Sole Operator - High Pie | **October 2022-Present**

- Run sourcing, supplier selection, production, pricing, inventory, fulfillment, and customer issue resolution; maintain compliance documentation for a hemp-product business.

Purchasing Coordinator - Lennar | **May 2018-October 2022**

- Reconciled cost and documentation discrepancies across bids, contracts, budgets, and vendor records before field execution.
- Coordinated vendors, trades, and internal stakeholders against construction deadlines and cost, quality, documentation, and compliance requirements.

CORE SKILLS

Technical project delivery: problem framing; requirements; specifications; acceptance criteria; implementation coordination; review and release decisions

Software quality and evaluation: test strategy; adversarial testing; failure analysis; evidence review; regression testing; AI evaluation

Technical environments and tools: Rust; Python; Next.js/React; TypeScript; Cloudflare Workers; D1; Git, GitHub, and CI

Operations and analysis: vendor and stakeholder coordination; bids, contracts, and budgets; discrepancy resolution; Excel, Power Query, and Power Pivot

EDUCATION

University of North Texas - B.A., Sociology, Economics, and History

Brooklyn Law School - Coursework toward J.D., 2014-2017; degree not conferred
