CHRIS McNOSKY

Software Testing and Defect Analysis

Colleyville, TX | 817-360-0687 | cmcnosky@gmail.com
linkedin.com/in/chris-mcnosky | github.com/cmcnosky

Open-source contributor with an AI-assisted Grafana fix merged in September 2026 and five Go regression cases. Investigates defects and checks coding-agent completion claims against evidence. Brings business systems troubleshooting and purchasing coordination experience across five Lennar divisions.

CORE SKILLS

Defect analysis | Regression testing | Requirements analysis
Test-result review | Technical documentation | Business systems troubleshooting
Tools: Git and GitHub | Claude Code | JD Edwards | Citrix | BuildPro

INDEPENDENT TECHNICAL PROJECTS

AI-assisted development and evaluation

Grafana short-URL compatibility fix | Merged Sep 25, 2026 | PR 131070

- Contributed a fix for malformed short-URL API links by using the authenticated numeric organization ID instead of the Kubernetes resource namespace.
- Submitted the fix with five Go regression cases covering organization IDs, Grafana Cloud, and configured application subpaths.

Tokio conditional branch support | Open and unmerged | PR 8374

- Submitted Rust changes supporting conditionally compiled select! branches, removing disabled branches before state and polling generation.
- Included integration and compile tests covering fairness, grammar compatibility, macro hygiene, and the 64-branch boundary.

Stinger coding-agent evaluation framework | Personal project | PR 2

- Directed AI-assisted development of an evaluation framework with predefined criteria, reproducible reports, integrity checks, and continuous-integration gates.
- Directed a refusal-classification repair with regression tests for captured messages, using completion claims as negative controls.

PROFESSIONAL EXPERIENCE

Sole Operator | High Pie 2022 - 2026

- Investigated supplier and fulfillment discrepancies using order records; managed purchasing, inventory, pricing, documentation, and customer issues.

Purchasing Assistant | Lennar May 2018 - Nov 2022

Initially hired as a Design Assistant; later handled purchasing coordination duties

- Served as a regional point of contact for five divisions, coordinating purchasing questions and record corrections with divisional, regional purchasing, and BuildPro teams.
- Resolved home-start errors and guided staff in JD Edwards, Citrix, and BuildPro; maintained vendor assignments, pricing, cost and trade codes, and take-offs.
- Reviewed community budgets and cost variables, created price contracts, and supported purchase-order revisions.

EDUCATION

University of North Texas | B.A. in Sociology; Economics minor
